

HOBBY LINE

HOBBY LINE

From the earth, for the earth, our bio-stimulants are rich in levorotatory amino-acids which boost the root proliferation. One of the results is an increase in the growth of the plants: healthier plants make for tastier food. We are proud to present our new hobby line for nurseries, bonsai trees, green plants and potted flowers.

GRENA ULTRA MICRO

Permitted in organic farming

GRENA ULTRA MICRO comes in micro-pellets 2mm, for even distribution and low visual impact, especially on golf courses, lawns and flowerbeds. The cutting edge of our range, the product is an 100% natural source of energy for your house and garden plants.

Available in: 2kg - 10kg (micro-pellet)

GRENA GARDEN

Permitted in organic farming

GRENA GARDEN finds its use on ornamental lawns, domestic orchards and vegetable patches. It ensures mouthwatering taste in vegetables, and a sweeter bouquet in flowers, as well as brighter colors during the development of the plant.

Available in: 10kg (pellet)

GRENA LIFE

Permitted in organic farming

GRENA LIFE is ideal for the autumn-winter maintenance of your plants. A balanced nutrient concentration allows lawns, gardens and ornamental plants to keep healthy and stay protected during the cold season.

Available in: 10kg (micro-pellet)
